Aino Health’s solution go-live for the municipality of Botkyrka

Aino Health go-live with its SaaS solution to decrease sick leave within the municipality of Botkyrka and is at the same time introducing the concept of social impact bonds in Sweden. The remuneration model means that Aino Health is investing in services and consultancy, which are directly connected to improved social results for Botkyrka. The goal is to decrease sick leave, create a health-promoting workplace and keep sick leave at a low stable level. The remuneration is paid to Aino Health based on the results.

The municipality of Botkyrka is Aino Health’s first Swedish client, in the public sector, to be part of a project with social impact bonds in preventative corporate health management. Aino Health’s task is to manage a centralized sick-leave service, identify workplaces and employees within the municipality of Botkyrka with a risk of high absence and to support the purchaser in efforts to decrease absences. The goal is to decrease sick leave for days 1–14. The impact-based remuneration is calculated based on the actual decrease in sick leave.

“At Aino Health in Finland, we have over ten years’ experience of social impact bonds to decrease sick leave. To our knowledge, the collaboration with the municipality of Botkyrka with social impact bonds is the first ever performed in Sweden. It is also unique that Botkyrka is itself investing in hiring specialists in management support to help managers decrease sick leave. This means that we proactively work together with managers on an individual level, rather than implementing a general managerial- or healthcare programme” says Jyrki Eklund, CEO of Aino Health AB.

This press release was made public, through the agency of Jyrki Eklund, CEO and President of Aino Health AB, at 10.00 PM CET on September 26 2018.
