Aino Health and Finla in joint client project

Aino Health’s strategic partner Finla has concluded an agreement with a global player in the process industry regarding Aino HealthManager. The collaboration will begin with 1,700 new subscriptions to Ainos SaaS solution HealthManager in Finland. The solution will be launched to the client during the first quarter of 2019.

For the client, a world leader in the process industry, access to HealthManager means that the company gets a powerful tool for analysing sick leave, with the goal of developing more proactive corporate healthcare.

Aino will also deliver integration services for launching HealthManager, and Aino Analytics for analysis of absence data and health-related processes within the client’s operations, as a basis for improving the end client's corporate healthcare and productivity.

"It is very gratifying that our partner strategy is already showing results. In a short period of time, Finla has become established as an important supplier of Aino HealthManager," says Jyrki Eklund, CEO of Aino Health.

Finla and Aino Health concluded a partnership agreement in June 2018, which gives Finla the right to sell SaaS subscriptions to Aino HealthManager.
