DLT Solutions Named Red Hat Certified Cloud Service Provider

DLT Solutions certified to distribute Red Hat's enterprise-grade products inside AWS GovCloud

HERNDON, Va. (July 30, 2018) - DLT Solutions, an award-winning technology provider to the public sector, announced today that it has formalized an agreement with Red Hat to be a Certified Cloud Service Provider. Under this agreement, DLT Solutions will distribute Red Hat's on-demand products via their AWS Managed Services, and Red Hat technologies will be made available to vetted government customers and organizations in government-regulated industries that meet AWS GovCloud requirements.

"As a Red Hat Certified Cloud Service Provider, DLT will be able to offer our customers flexible pay-as-you-go pricing models, plus certified resources with the required expertise to help build and maintain a comprehensive Red Hat environment inside the AWS public cloud," said Danny Climo, DLT Senior Director of Platforms and Public Cloud.   As part of the Certified Cloud Service Provider program, Public sector customers and partners can use custom-developed or third-party ISV applications certified on Red Hat Enterprise Linux and other Red Hat solutions with greater confidence that these applications will function when used on a public cloud or managed service provider.

Since 2004, DLT has been a strategic partner to Red Hat and has been working together to help agencies accelerate their path to the cloud. DLT Solutions can now offer enterprise-grade cloud and managed services to customers for the Red Hat products that are already being utilized in datacenters today.
