

DLT Partners with Tripwire to Deliver Industry's Best Foundational Security Controls to the Public Sector

DLT to serve as distributor to the public sector, offering industry-leading Tripwire software and services on multiple contract vehicles.

HERNDON, Va. (August 29, 2018) - [DLT Solutions](#), an award-winning government solutions aggregator, announced today that it has partnered with Tripwire to provide industry-leading cybersecurity and compliance automation solutions to the public sector. Tripwire's innovative software and hardware products provide integrity assurance solutions that drive security, compliance and operational excellence for end users.

Tripwire's award-winning cybersecurity integrity solutions enable cyber situational awareness via change detection, monitoring and reporting for intelligence agencies and their mission partners, almost every civilian and independent federal agency, all DoD Branch services, as well as components of the Congressional and Judicial branches. Tripwire solutions are based on high-fidelity asset visibility and deep endpoint intelligence combined with business context; together these solutions integrate and automate security and IT operations.

"DLT is very excited about our new partnership with Tripwire," DLT Vice President of Sales Chris Wilkinson commented. "By leveraging this partnership, DLT will be able to help public sector agencies ensure their most critical data and assets are secure. We will be able to do this while simultaneously simplifying the procurement process for our customers by utilizing DLT's unparalleled contract expertise and public sector infrastructure."

"As the inventor of file integrity monitoring (FIM), Tripwire has a 20-year history of innovation, over 40 patents and the backing of its \$2B+parent company, Belden, a leading global connectivity company," said Mitchell Jukanovich, vice president of Federal at Tripwire. "Now more than ever, government is relying on proven best practices and subject-matter expertise from industry for guidance on defining their evolving cybersecurity needs. This new partnership with DLT gives us a greater opportunity to apply not just award-winning products, but to contribute two decades of experience and thought leadership in federal cyber strategy as a vital part of an agency's collective security team."

Through this partnership, DLT will be able to offer Tripwire Enterprise, which pairs the industry's most respected file integrity monitoring and security configuration management to provide real-time change intelligence and threat detection; Tripwire IP360, which proactively discovers, profiles, and assesses the vulnerability risk of all wired and wireless devices on an organization's network; Tripwire Log Center, which provides secure and reliable log collection to add real-time intelligence to machine data, with security analytics and forensics for rapid incident detection and response; and Tripwire Configuration Compliance Manager, which automates continuous configuration and compliance assessment. DLT's public sector customers will be able to procure industry-leading Tripwire software and services through various Government wide Acquisition Contracts (GWACs) including GSA, SEWP, CIO-CS and CDM.
