## Interim Report for Nilörngruppen AB (publ) Q1, January - March 2018

Period January - March

- Order bookings adjusted for currency effects amounted to MSEK 215 (201), for an underlying organic increase of order bookings of 7 percent.
- Consolidated order bookings increased by 1 percent, amounting to MSEK 202 (201).
- Revenue adjusted for currency effects amounted to MSEK 171 (159), for an underlying organic increase of order bookings of 8 percent.
- Consolidated revenue in SEK declined by 2 percent to MSEK 156 (159).
- Operating profit amounted to MSEK 13.4 (17.5).
- Profit for the period amounted to MSEK 9.3 (13.2).
- Earnings per share amounted to SEK 0.82 (1.16).
- Cash flow from operating activities amounted to MSEK -5.4 (-1.8).
- Net cash and cash equivalents (liability) amounted to MSEK 2.7 (-1.1).

## Significant events during the quarter

- Currency effects impacted revenue negatively in an amount of MSEK 15 during the quarter.
- The negative effect is attributable to the Easter holiday and the Chinese New Year (most deliveries are to China) relative to the first quarter which was very strong last year.

## Significant events after the end of the period under review

- Nilörngruppen's class B share is traded on NASDAQ Stockholm's main list since 4 April.

## PRESIDENT'S STATEMENT

Dear shareholders,

The development during the first quarter of the year was in accordance with my expectations. Order bookings increased by 7 percent and revenue adjusted for currency effects increased by MSEK 20 to MSEK 179, which makes for underlying organic growth of 8 percent.

This year Easter came in March instead of April last year and the Chinese New Year fell later, which had a negative calendar effect with lower sub-orders as a consequence.

We are seeing a slightly lower gross margin during the quarter, which is due to a large order of packaging with lower margin.

We continue to grow on existing markets as more customers buy everything from Nilörn, which creates synergies both in terms of lead times and costs. Aside from focusing on our existing customers, we are also working on attracting new customers and we have several interesting projects under development, even though the decision process in many cases is drawn-out.

Since we sense great opportunities in continued expansion o packaging, we have recruited an experienced product manager to support the sales organisation in Europe.

Our production business in Bangladesh has developed well. Our investment to create factory with focus on sustainability has been very well received and even though it accounts for a small part of Nilörn's total business, we have great faith in Bangladesh as a production country going forward.

Nilörn is sensing growing interest in RFID from customers and we will therefore continue to strengthen our offer further.

Overall, I continue to have a positive view of 2018 and the years to come. We have a strong offer and we are sensing great interest on the part of brands in the European market. I regard Nilörn's prospects for future growth as excellent, despite a somewhat more challenging market climate in certain segments.

Claes af Wetterstedt
President

## Period January - March

## Order bookings

Order bookings adjusted for currency effects amounted to MSEK 215 (201), for an increase in underlying organic order bookings of 7 percent. Consolidated order bookings in SEK increased by 1 percent, amounting to MSEK 202 (201).

## Net revenue

Revenue adjusted for currency effects amounted to MSEK 171 (159), for an increase in underlying organic growth of 8 percent. Consolidated revenue in SEK declined by 2 percent to MSEK 156 (159). HKD was weaker by 13 percent against SEK compared to the equivalent year-ago period. This impacted revenue greatly as a significant portion of Nilörn's revenue is in HKD.

Since the Group is fairly well balanced in currencies overall, his has a marginal effect on earnings.

## Gross profit

The gross margin was 45.7 (46.2) percent. The gross profit margin was negatively affected by the product mix as a major packaging order with a slightly lower margin was invoiced in a quarter which normally sees lower revenue.

## Costs

External costs declined to MSEK 22.5 (23.3) and personnel costs increased by 34.1 percent (32.1). The increase in personnel costs is a function of more employees to meet the increased volume.

## Operating profit

Operating profit amounted to MSEK 13.4 (17, 2), which gives an operating margin of 8.6 (11.0) percent. The lower operating margin for the quarter is attributable to the lower gross margin.

## Net finance items, taxes and profit for the period

Net finance items in the mount of MSEK 1.0 is mainly attributable to a negative currency translation difference. Taxes amounted to MSEK $3.0(4,1)$ and refit after taxes amounted to MESK 9.3 (13.2).

Cash flow, capital expenditures, financing and liquidity
Cash flow from operating activities amounted to MSEK 11.0 (18.6).

Cash flow from investment activities amounted to MSEK -1.6
( -8.5 ) with MSEK -1.5 attributable to investment in a new enterprise system. Net cash and cash equivalents stood at MSEK 2.7 at the end of the period (-1.1).

## Equity

Consolidated equity amounts to MSEK 166.6, after an increase during the period in the amount of net profit MSEK 9.3 and a translation difference in the amount of MSEK 3.3. The translation difference is the net effect of converting equity in the foreign subsidiaries into SEK and the positive effect of a weaker Swedish krona.

## Personnel

The average number of employees in the Group was 470 (446), 202 (209) of whom were women (relative to the turn of the year). Of the total number of employees 234 persons, or 50 percent were active in production and warehousing.

## Transactions with closely related parties

No transactions between the Nilorn Group and closely related parties with significant impact on the Group's profit and financial position have occurred during the period. The Parent Company's transactions with subsidiaries refer to design, product development, IT and other services.

## Parent Company

The Parent Company's operations largely consist of handling group-wide functions, such as branding and design, product development, finances, administration, information and IT. The average number of employees was 21 (21).

Net revenue for the period amounted to MSEK 5.4 (4.6). Operating profit amounted to MSEK $-0.3(-0.3)$ and profit after taxes amounted to MSEK $-0.7-0.6$ ).

## Risks and uncertainty factors

Given its international operations, Nilörngruppen is always subject to a variety of financial risks. The significant risks and uncertainty factors facing Nilörngruppen are currency risks, political risks in individual countries, credit risks and IT security as described in Nilörngruppen's 2017 Annual Report, note 2. The risks reported are deemed to be essentially unchanged.

## Review

This report has not been subject to review by the Company's auditors.

Since there are no comprehensive profit items, comprehensive income coincides with the period's results.

## Notes

## 1. Accounting policies

As was the case with the Annual Accounts for 2016, the Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by EU, recommendation No 1 (RFR 1 ) of the Swedish Financial Reporting Board. As was the case with the Annual Accounts for 2016, the Parent Company prepares its financial statements in accordance with the Annual Accounts Act and recommendation No 2 (RFR 2) of the Swedish Financial Reporting Board. The Year-end Report is prepared in accordance with IAS 34 and the Swedish Annual Accounts Act. New accounting policies for 2018

On January 12018 IFRS 15 "Revenue from Contracts with Customers" and IFRS 9 "Financial instruments" entered into force.

The transition to IFRS 9 had no effect on the Group's way of classifying financial assets and liabilities, and hedge accounting is consistent with the new hedge accounting rules. Nilörngruppen applies the simplified model for anticipated credit losses according to which total anticipated credit losses for the remaining tenor of the receivable is recognised. When assessing future expected credit losses due consideration is
given to historical and forward-looking information. The transition has not resulted in any transitional effects that need to be reported.

IFRS 15 "Revenue from Contracts with Customers" has not entailed any changes for the Nilörn Group. Most of the Nilörn Group's revenue comes from the sale of goods, recognised when control over the goods is transferred to the customer. Variable compensation in the form of discounts, bonuses and returns constitute a part of the transaction price.

## New accounting policies for 2019

IFRS 16 "Leases" will replace IAS 17 "Leases" on 1 January 2019. This standard requires that assets and liabilities attributable to all leases with a few exceptions are reported in the balance sheet and is applicable for financial years beginning 1 January 2019 or later. For Nilörn the largest items refers to rental of office and warehouse space. However, the term of the contracts in Hong Kong, which accounts for a relatively major part of the Group's rental expenses, is relatively short. The sum total of future lease payments amounts to MSEK 25 (see Note 25 in the Annual Report for 2017), with an estimated present value of MSEK 23 calculated with a 3 percent discount rate.

## 3. Definitions of alternative key financial indicators

ESMA (The European Securities and Markets Authority) has published guidelines for alternative key financial indicators for companies with securities listed on a regulated market within EU. These guidelines shall be applied to alternative key financial indicators used starting 3 October 2016. Reference is made in the annual accounts to a number of non-IFRS performance metrics used to help investors as well as management to analyse the company's operations. These financial metrics should therefore not be seen as replacements for metrics defined according to IFRS. Since all companies do not calculate financial metrics in the same way, they are not always comparable with metrics used by other companies. These financial metrics should therefore not be seen as replacements for metrics defined according to IFRS. We describe below the various non-IFRS performance metrics used as a complement to the financial information reported in accordance with IFRS and how these metrics have been used.
