Chaim Katzman, Founder and CEO Commented: “We are continuing to consistently implement the strategy of increasing the private real estate portfolio, while focusing on urban properties in major cities around the world, which are densely populated with strong demographics. During the quarter and subsequent thereto, our private subsidiaries have acquired unique properties at a cost exceeding NIS 1.4 billion and we have also realized our entire investment in Regency Centers. The private property component of the Company today constitutes 37% of the value of our holdings, and we expect to see this trend continue; at the same time, we will continue reducing the Company's leverage in order to achieve an international credit rating. The operating results of the Company and of our private properties portfolio in particular are impressive. Same property NOI in the period grew by 3.1%, with noteworthy performances being achieved in Brazil and Israel where same property NOI grew by 13.9% and 4.9%, respectively. Same property turnover in Brazil and Israel rose 7.9% and 4.1% in the period, compared to the same period in the prior year, respectively. The occupancy rate rose 1.4% in the period and stands at 96.3%, a rising trend that is evident in all the regions where we operate. All of these provide us with evidence that our strategy is succeeding and that the properties we acquire, develop and manage are creating a continual rise in rentals and we anticipate that they will create a surplus yield that will continue for many years to come.”

The Company believes that publication of FFO, which is computed according to EPRA guidance, more correctly reflects the operating results of the Company, since the Company's financial statements are prepared in line with IFRS.
