Use of Non-GAAP Financial Measures

This presentation includes certain non-GAAP financial measures such as EBITDA and Adjusted EBITDA. These non-GAAP financial measures are not meant to be considered in isolation or as a substitute for results prepared in accordance with accounting principles generally accepted in the United States (GAAP). A reconciliation of non-GAAP financial measures included in this presentation to the most directly comparable financial measures calculated and presented in accordance with GAAP is set forth in the Appendix of this presentation or on our web site at www.martinmidstream.com

MMLP's management believes that these non-GAAP financial measures may provide useful information to investors regarding MMLP's financial condition and results of operations as they provide another measure of the profitability and ability to service its debt and are considered important measures by financial analysts covering MMLP and its peers.

MARTIN MIDSTREAM PARTNERS L.P.

Forward Looking Statements

Statements included that are not historical facts (including any statements concerning plans and objectives of management for future operations or economic performance or assumptions or forecasts related thereto), are forward-looking statements. These statements can be identified by the use of forward-looking terminology including “forecast,” “may,” “believe,” “will,” “expect,” “anticipate,” “estimate,” “continue,” or other similar words. These statements discuss future expectations, contain projections of results of operations or of financial condition or state other “forward-looking” information. We and our representatives may from time to time make other oral or written statements that are also forward-looking statements.

These forward-looking statements are based upon management’s current plans, expectations, estimates, assumptions and beliefs concerning future events impacting us and therefore involve a number of risks and uncertainties. We caution that forward-looking statements are not guarantees and that actual results could differ materially from those expressed or implied in the forward-looking statements.

Because these forward-looking statements involve risks and uncertainties, actual results could differ materially from those expressed or implied by these forward-looking statements for a number of important reasons. A discussion of these factors, including risks and uncertainties, is set forth in Martin Midstream Partners L.P.’s annual and quarterly reports filed from time to time with the Securities and Exchange Commission. Martin Midstream Partners L.P. expressly disclaims any intention or obligation to revise or update any forward-looking statements whether as a result of new information, future events, or otherwise.

A black and white photograph of an industrial facility, likely a refinery or chemical plant. The scene features several tall, cylindrical smokestacks or distillation columns, some with dark bands near the top. There are also large horizontal storage tanks and a complex network of pipes and structural steel. The facility is situated on a gravel-covered ground. The sky is overcast with dark clouds. The overall tone is industrial and somewhat somber due to the monochrome palette.

2018 GUIDANCE

MARTIN MIDSTREAM PARTNERS L.P.

Partnership Overview

- NASDAQ Listed: MMLP
- Formed October 31, 2002
- MMLP is a publicly traded, diversified master limited partnership with operations including:
 - Natural Gas Services
 - Terminalling & Storage
 - Sulfur Services
 - Marine Transportation
- MMLP Trading Summary ⁽¹⁾
 - Unit Price: \$16.05
 - Units Outstanding 38.5 million
 - Market Cap: \$618 million
 - Quarterly Distribution: \$0.50/\$2.00 annualized
 - Current Yield: 12.5%

⁽¹⁾ As of February 20, 2018

\$156.2 million Adjusted EBITDA

(\$171.8 million before \$15.6 million unallocated SG&A and other non-operating income)

MARTIN MIDSTREAM PARTNERS L.P.

Strong Fee-Based Contract Mix

Natural Gas Services

- Fee-based, multi-year natural gas storage contracts (weighted average life approximately 3.0 years as of December 31, 2017)
- Fee-based, regulated common carrier tariffs (WTLPG)
- Margin-based, wholesale NGLs

Terminalling & Storage

- Fee-based contracts for traditional storage assets – Specialty and Marine Shore-Based Terminals (with minimum volume commitments)
- Fee-based, long-term tolling agreement for Smackover Refinery (with guaranteed minimum volume)
- Margin-based, lubricants contracts/revenue

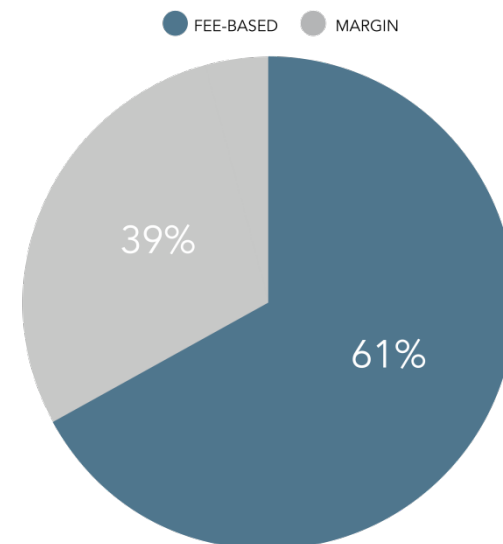

Sulfur Services

- Fee-based, multi-year “take-or-pay” contracts for prilling assets
- Fee-based molten sulfur transportation and handling contract
- Margin-based fertilizer contracts/revenue

Marine Transportation

- Fee-based, day-rate contracts

2018 Adjusted EBITDA*

*See slide 36 of the Appendix for reconciliation of Fee-based vs. Margin-based cash flows by segment

An aerial, black-and-white photograph of an industrial facility, likely a refinery or petrochemical plant. The facility features several large, cylindrical storage tanks connected by a complex network of pipes and walkways. To the left, there are several large, rectangular industrial buildings with gabled roofs. In the background, a long train consisting of many dark-colored railcars is parked on tracks. The surrounding area appears to be a mix of industrial land and some undeveloped ground.

MARTIN MIDSTREAM PARTNERS L.P.

BANK AMENDMENT

MARTIN MIDSTREAM PARTNERS L.P.

Bank Amendment - Situation Overview & Objectives

- MMLP has amended its revolving credit facility to accommodate growth capital expenditures necessary for the previously announced WTLPG extension/expansion project.
 - MMLP expects to spend approximately \$40 million during 2018 on the project.
- Working with our bank group, we achieved two primary objectives:
 - **Objective No. 1: Covenant Relief for Pipeline Expansion**
 - Starting in the first quarter of 2017, the amendment will provide short-term (5 quarters) covenant relief by increasing the total leverage ratio to 5.75x with step downs back to 5.25x.
 - **Objective No. 2: Working Capital Sublimit**
 - Borrowings under the working capital sublimit are excluded from the total leverage and secured leverage calculations given the seasonal, self-liquidating nature of the NGL (butane) business.
 - Sublimit not to exceed \$75 million, with seasonal step-down to \$10 million for the months of March through June of each fiscal year
 - Sublimit subject to a monthly borrowing base not to exceed 90% of the value of forward sold / hedged inventory

A detailed description of the credit facility amendment is shown on slide 39 of the Appendix.

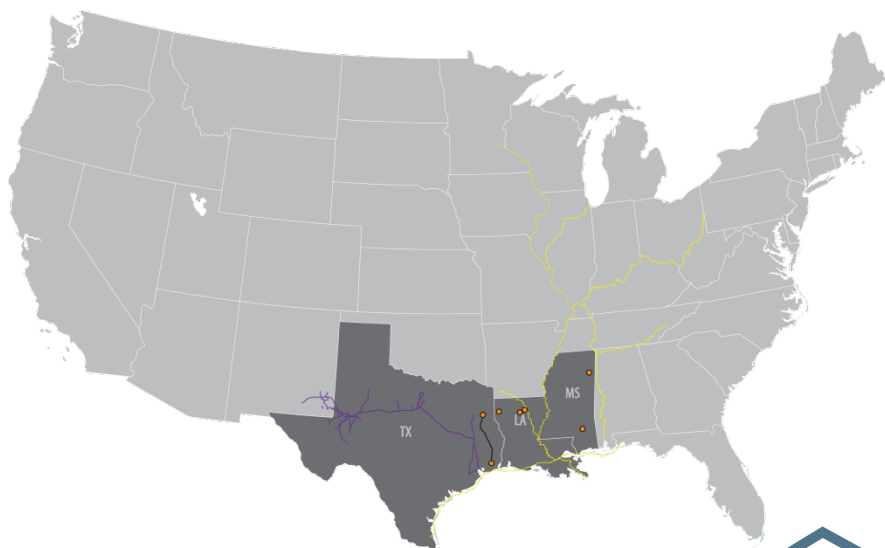

MARTIN MIDSTREAM PARTNERS L.P.

OPERATIONAL OVERVIEW

MARTIN MIDSTREAM PARTNERS L.P.

Natural Gas Services Overview

- Cardinal Gas Storage operates approximately 50 billion cubic feet of natural gas storage capacity across four facilities throughout northern Louisiana and Mississippi.
- MMLP distributes NGLs purchased primarily from refineries and natural gas processors. The Partnership stores and transports NGLs for delivery to refineries, industrial NGL users and wholesale delivery to propane retailers.
- MMLP owns an NGL pipeline which spans approximately 200 miles from Kilgore, Texas to Beaumont, Texas. MMLP also owns and operates approximately 2.4 million barrels of underground storage capacity for NGLs.
- MMLP owns a 20% non-operating interest in WTLPG. WTLPG owns an approximate 2,300 mile common carrier pipeline system that transports NGLs from New Mexico and Texas to Mont Belvieu, Texas for fractionation.

Key Assets	2017 Adj. EBITDA	2018E Adj. EBITDA
Cardinal	\$39.4	\$31.0
Butane	\$28.1	\$26.1
WTLPG	\$5.3	\$8.5
NGLs	\$0.9	\$1.5
Propane	\$2.1	\$2.6
Total NGS	\$75.8	\$69.7

\$ millions

MARTIN MIDSTREAM PARTNERS L.P. – NATURAL GAS SERVICES

Cardinal Gas Storage

Firm Contracted/Fee-Based Storage Model

- Firm contracted model (90%) for natural gas storage with interruptible service upside
- Long-term contracts – Cardinal's weighted average contract life of approximately 3.0 years protects against significant cash flow deterioration in the near term
- Potential storage demand drivers:
 - LNG exports
 - Natural gas exports to Mexico
 - Increasing industrial and petrochemical use
 - Coal-fired power conversions to natural gas
- Increased volatility – Due to demand drivers above, natural gas price volatility should enhance the value of storage assets

Cardinal Contract Summary

	Type	Working Gas Capacity (bcf)	Currently Contracted	Years
Arcadia	Salt Dome	16.0	97%	2.2
Cadeville	Depleted Reservoir	17.0	100%	5.4
Perryville	Salt Dome	12.7	67%	1.7
Monroe	Depleted Reservoir	7.4	95%	2.6

Source 10-K, December 31, 2017

Cardinal Gas Storage Adjusted EBITDA

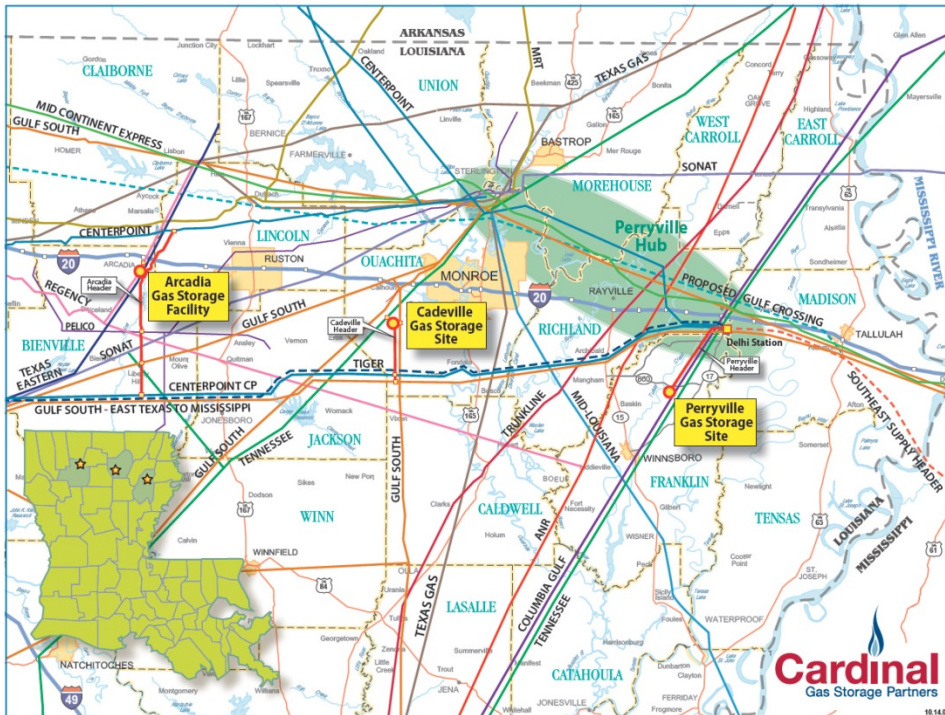

(1) Cardinal wholly-owned since August 2014

(2) Reflective of the results from 2017 open season and original Perryville contracts maturing 6/30/18

MARTIN MIDSTREAM PARTNERS L.P. – NATURAL GAS STORAGE

Cardinal Gas Storage Asset Overview

Arcadia Gas Storage

- Salt dome facility (Arcadia, Louisiana) – 16.0 bcf

Perryville Gas Storage

- Salt dome facility (Delhi, Louisiana) – 12.7 bcf

Cadeville Gas Storage

- Depleted reservoir facility (Monroe, Louisiana) – 17.0 bcf

Monroe Gas Storage

- Depleted reservoir facility (Amory, Mississippi) – 7.4 bcf

MARTIN MIDSTREAM PARTNERS L.P. – NATURAL GAS SERVICES

Butane Optimization

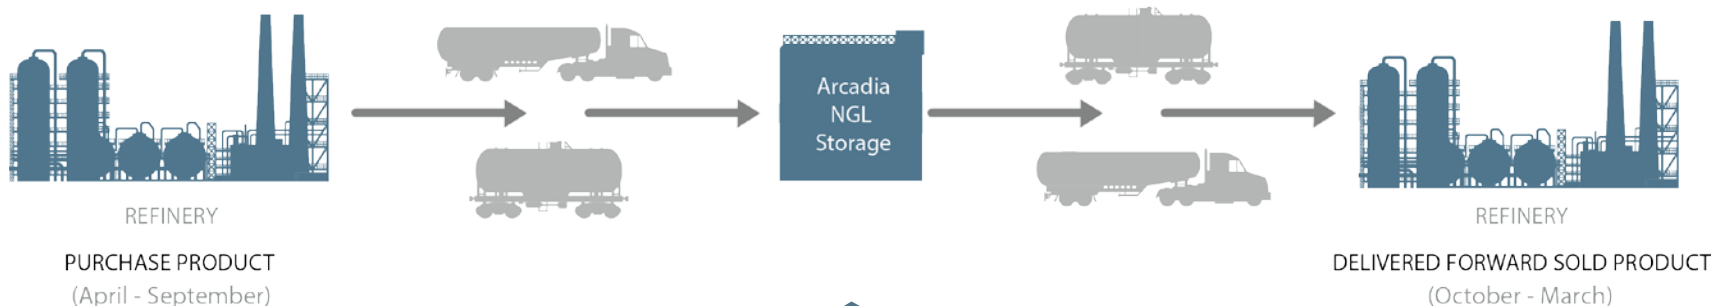

Butane Optimization

- Refineries adjust the vapor pressure of gasoline to meet seasonal EPA standards and are allowed to blend butane into the gasoline pool during winter months.
- MMLP owns and leases a network of underground storage facilities in Louisiana and Mississippi.
- MMLP has rail and truck transloading capabilities at its Arcadia, Louisiana facility.
- Further assists refineries in balancing butane offtake during non-blending seasons

Butane Adjusted EBITDA

SAMPLE BUTANE EXCHANGE

MARTIN MIDSTREAM PARTNERS L.P. – NATURAL GAS SERVICES

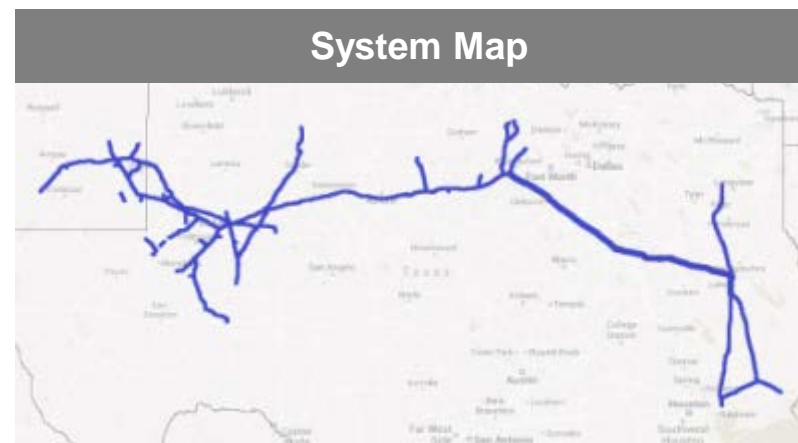

West Texas LPG Pipeline (WTLPG)

- The WTLPG system is approximately 2,300 miles of Y-grade pipeline from Eastern New Mexico to Mt. Belvieu, Texas.
- MMLP owns a 20% non-operating interest in WTLPG (OKE is owner/operator of remaining 80%).
- Nameplate capacity of approximately 240 MBbls/day; 2017 volumes were approximately 190 MBbls/day
- Connection into Cajun Sibon pipeline provides delivery alternative to Mt. Belvieu, Texas.
- Moves west to east/southeast across multiple producing regions:
 - Permian Basin
 - Barnett Shale
 - East Texas/Cotton Valley
- Planned expansion into Delaware Basin on-line 3Q 2018
- Railroad Commission of Texas tariff dispute and adjudication process is ongoing. ⁽¹⁾

WTLPG Adjusted EBITDA

⁽¹⁾ See slide 38 in Appendix for detailed timeline of RRC tariff case

MARTIN MIDSTREAM PARTNERS L.P. – NATURAL GAS SERVICES

NGLs & Propane

NGL

- Assets include 200-mile East Texas Pipeline transporting Y-grade from Kilgore to Beaumont, Texas for fractionation; East Texas market volumes gathered by truck for pipeline injection
- Spindletop terminal supplies (Beaumont, Texas) natural gasoline to Beaumont area customers

Propane

- Wholesale propane distribution to approximately 100 regional customers throughout the Southeastern U.S.
- Martin LP provides local propane distribution in East Texas market.
- Propane volumes have declined over the past several decades as distributors are consolidated and alternative heat sources are utilized.

NGLs Adjusted EBITDA

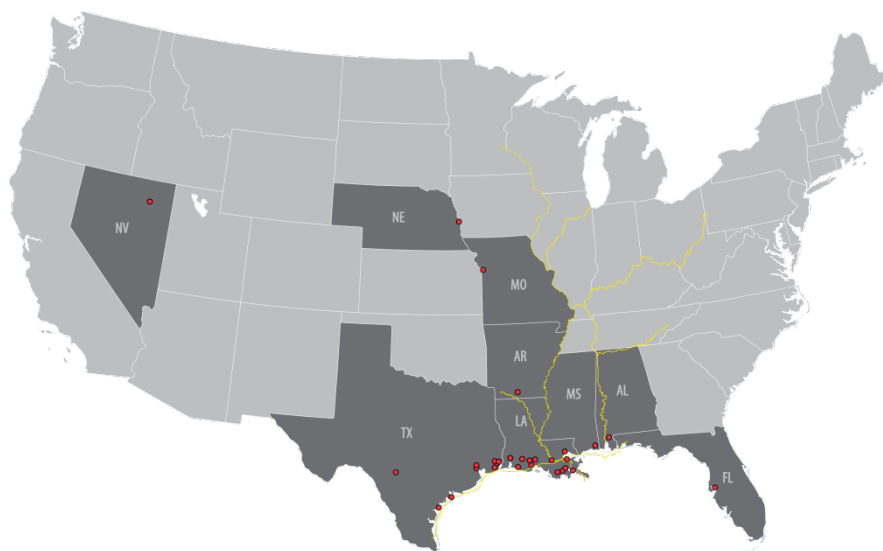

Propane Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P.

Terminalling & Storage Overview

- MMLP operates 38 terminal facilities with an aggregate storage capacity of 2.9 million barrels.
- These facilities provide storage, refining, blending, packaging and handling services of petroleum products and by-products and petrochemicals through:
 - 22 marine shore-based terminals across the U.S. Gulf Coast
 - 16 specialty terminals throughout the U.S. Gulf Coast and other regions
- The location and composition of these terminals are structured to complement MMLP's other businesses.

T&S Segment	2017 Adj. EBITDA	2018E Adj. EBITDA
Marine Shore-Based Terminals	\$14.5	\$12.4
Martin Lubricants	\$9.4	\$11.5
Smackover Refinery	\$21.4	\$19.9
Specialty Terminals – Other	\$7.3	\$10.2
Hondo Asphalt	\$1.9	\$4.8
Total T&S	\$54.5	\$58.8

\$ millions

MARTIN MIDSTREAM PARTNERS L.P. – TERMINALLING & STORAGE

Marine Shore-Based Terminals

Gulf Coast Fuel and Lubricant Distribution Network

- 22 terminals along the Gulf Coast from Theodore, Alabama to Corpus Christi, Texas
- Terminalling assets utilized by Martin Energy Services (MRMC) to facilitate the distribution and marketing of fuel and lubricants to oil and gas exploration and production companies, oilfield service companies, marine transportation companies and offshore construction companies
- Additional logistical support services provided:
 - Storage and handling of tubular goods
 - Loading and unloading bulk materials
 - Providing facilities and equipment to store and mix drilling fluids
- Fee-based contract structure provides stable cash flow.
 - Annual MVC contract with MRMC guaranteeing minimum fuel throughput

Marine Shore-Based Terminals Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P. — TERMINALLING & STORAGE

Martin Lubricants

Lubricant Blending & Packaging

- Specialty lubricant product blending and packaging assets located within MMLP's Smackover Refinery in Smackover, Arkansas include:
 - 235,000 sq. ft. warehouse
 - 3.9 million gallons bulk storage
- MMLP purchases base oils to blend and package branded and private label lubricants for agricultural and industrial applications.

Lubricant Packaging Facility, Smackover, Arkansas

Grease

- Commercial and industrial grease processing and packaging assets located in Kansas City, Missouri and Houston, Texas include:
 - 75,000 sq. ft. warehouse
 - 0.2 million gallons bulk storage

Martin Lubricants Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P. – TERMINALLING & STORAGE

Smackover Refinery

Specialized Naphthenic Refinery

- 7,700 bpd capacity naphthenic lube refinery located in Smackover, Arkansas
- Specialized facility processes crude oil into finished products including naphthenic lubricants, distillates and asphalt
- Naphthenic lubricants have customized non-paraffinic industrial uses including:
 - Transformer oils
 - Rubber extenders
 - Base oil for lubricants
- Fee-based contract structure provides stable cash flow.
 - Long-term tolling agreement with MRMC eliminates commodity exposure and working capital requirements

Smackover Refinery, Smackover, Arkansas

Smackover Refinery Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P. – TERMINALLING & STORAGE

Specialty Terminals

Specialty Terminals Overview

- Network of 14 terminals which facilitate the movement of petroleum products and by-products and petrochemicals from oil refiners and natural gas processing facilities
- Specialized capabilities include the ability to store and handle products with a wide range of temperature requirements (-30° to +400°F) and receives products transported by vessel, barge, rail or truck
- Products handled include:
 - Anhydrous ammonia (temp requirement: -30°F)
 - Asphalt (temp requirement: up to 400°F)
 - Crude oil
 - Fuel oil
 - Molten sulfur (temp requirement: 270°F)
 - Sulfuric acid
 - Other assorted petroleum products and by-products

Hondo Asphalt Terminal, Hondo, Texas

Specialty Terminals Adjusted EBITDA ⁽¹⁾

⁽¹⁾Represents Specialty Terminals cash flow from ongoing operations

⁽²⁾Represents partial year 2017 (asset purchased February 22, 2018) and full year 2018 operations from Hondo Asphalt Terminal

MARTIN MIDSTREAM PARTNERS L.P. – TERMINALLING & STORAGE

Specialty Terminals

Expertise In “Hard to Handle” Product and By-Product Logistics

Specialized Sites

- Hondo Asphalt Terminal
 - Facility located 40 miles west of the San Antonio city center with capacity of 182,100 barrels of asphalt storage, and blending and processing capabilities
 - Transportation advantage over the competition in relation to serving strong demographic growth area of San Antonio and the surrounding markets
 - Located in close proximity to multiple aggregate quarries and surrounded by numerous hot mix plants
 - Third party supply optionality from the Gulf Coast and Midwest regions

Specialized Sites (continued)

- South Houston and Omaha Asphalt
 - Asphalt terminalling and processing facilities backed with minimum throughput guarantee (with MRMC)
- Dunphy
 - Elko, Nevada sulfuric acid terminal serving the mining industry
 - Minimum throughput guarantee
- Tampa
 - Asphalt and fuel oil terminalling capabilities
 - Minimum throughput guarantees (with MRMC and multiple other counterparties)

MARTIN MIDSTREAM PARTNERS L.P. – TERMINALLING & STORAGE

Specialty Terminals

Expertise In “Hard to Handle” Product and By-Product Logistics

Specialized Sites (continued)

- Beaumont Neches
 - Multi-service terminal
 - Sulfur offtake and gathering point for Texas and Louisiana refiners
 - Deep water and barge dock access
 - Serviced by 3 rail lines (BNSF, KCS, UP)
 - Dry bulk shiploader – 20,000 tons/day
 - Additional 96 acres available for expansion
- Beaumont Spindletop
 - Natural gasoline terminal providing feedstock to petrochemical manufacturer
- Beaumont Stanolind
 - Multi-product handling facility including:
 - Molten sulfur
 - Asphalt/Fuel oil
 - Sulfuric acid

Dunphy Sulfuric Acid Terminal, Elko, Nevada

MARTIN MIDSTREAM PARTNERS L.P.

Sulfur Services Overview

- Molten sulfur, a refinery by-product is aggregated, stored and prilled through MMLP's integrated value chain systems along the U.S. Gulf Coast and Northern California region.
- MMLP manufactures and markets sulfur-based fertilizers and related sulfur products (sulfuric acid) to wholesale fertilizer distributors and industrial users.
- MMLP has the necessary assets and expertise to handle the unique requirements for transportation and storage of molten sulfur.
- By managing sulfur offtake, MMLP assists refineries in balancing production runs.

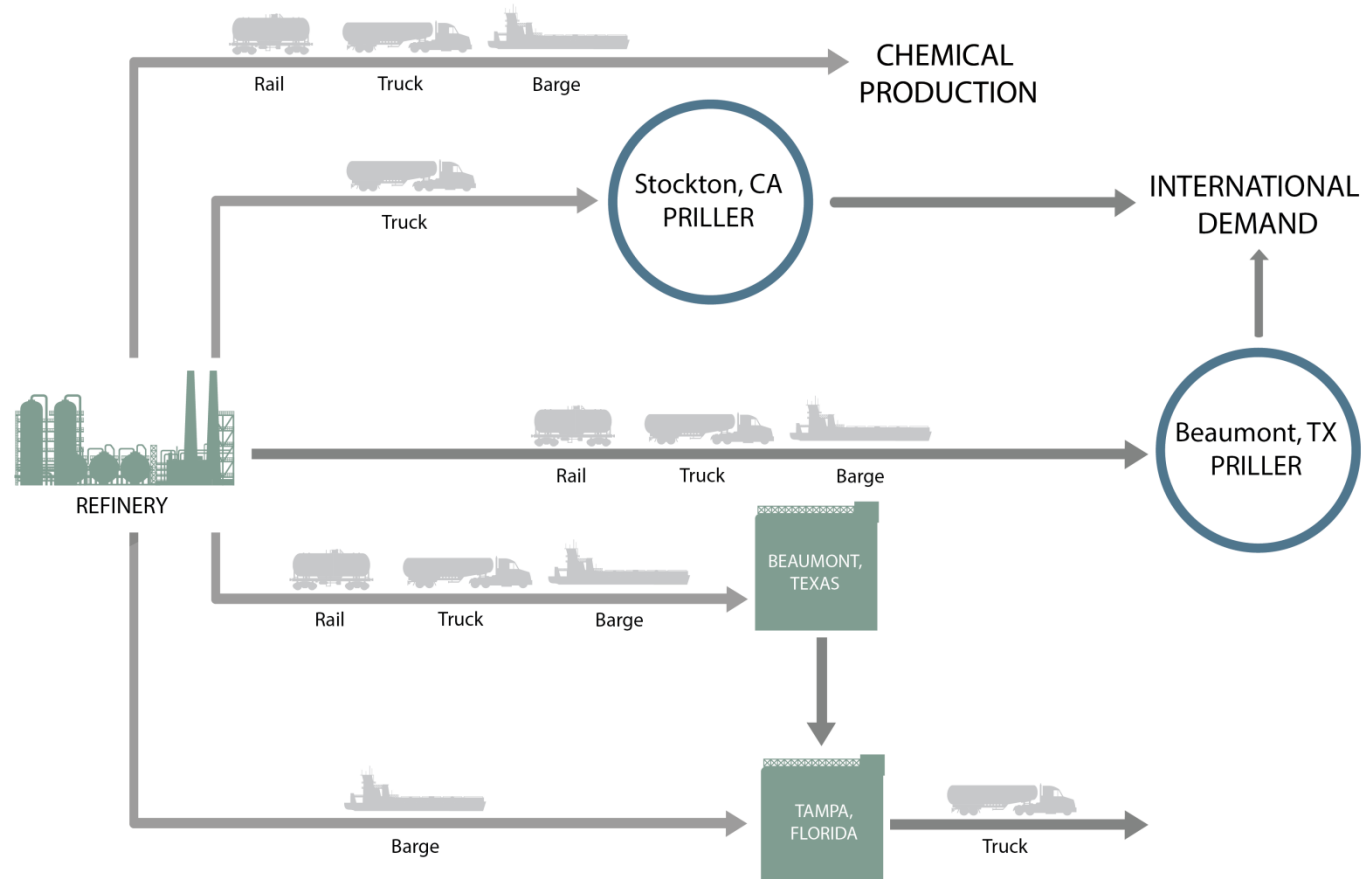

Sulfur Services Segment	2017 Adj. EBITDA	2018E Adj. EBITDA
Fertilizer	\$19.6	\$21.4
Molten Sulfur	\$6.9	\$6.1
Sulfur Prilling	\$7.5	\$7.0
Total Sulfur Services	\$34.0	\$34.5

\$ millions

MARTIN MIDSTREAM PARTNERS L.P. – SULFUR SERVICES

Integrated Sulfur Value Chain

- Provides transportation, processing and marketing services necessary to move product from producer to consumer
- Intermodal transportation offers multiple fee opportunities for MMLP

MARTIN MIDSTREAM PARTNERS L.P. – SULFUR SERVICES

Fertilizer

Fertilizer Overview

- MMLP manufactures and markets sulfur-based fertilizers and related sulfur products for agricultural and industrial use from manufacturing plants in Texas and Illinois.
- Typical customers include large distributors that own or control local retail and wholesale distribution outlets.

Supply/Demand

- The single largest factor influencing fertilizer demand in the U.S. is corn acres planted.
- Global population growth is expected to further increase demand for corn from the U.S. (food/fuel-ethanol).
- 90.2 million corn acres were planted in 2017; current USDA estimate for 2018 is 91.0 million acres

Fertilizer Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P. — SULFUR SERVICES

Molten Sulfur

Handling and Transportation Agreement

- MMLP transports molten sulfur from U.S. Gulf Coast refineries to the Tampa market for fertilizer production.

Supply

- Sulfur production is driven by refinery utilization and demand for refined products.
- Refiners require security of by-product offtake

Demand

- Demand for sulfur is primarily driven by fertilizer and sulfuric acid demand both of which are correlated with global industrial and agricultural economic drivers.

Molten Sulfur Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P. – SULFUR SERVICES

Prilled Sulfur

Prilling Agreements

- Refiners pay MMLP minimum reservation fees, plus additional operating fees for prilling services
- Contracts consist of 3 to 5 year service agreements with evergreen provisions – long-term customer relationships

Supply/Demand

- Security of sulfur/by-product offtake is critical to operational stability of all refiners
- Prilled sulfur enables large scale transportation for exportation on dry bulk vessels
- At Beaumont, Texas the export option provides pricing leverage for Gulf Coast refiners selling sulfur into the domestic market.
- At Stockton, California export is the primary option for disposal of residual sulfur production from Northern California refineries.

Terminal	Location	Production Capacity	Products Stored
Neches	Beaumont, Texas	5,500 metric tons/day	Molten, prilled & granulated sulfur
Stockton	Stockton, California	1,000 metric tons/day	Molten & prilled sulfur

Sulfur Prilling Adjusted EBITDA

MARTIN MIDSTREAM PARTNERS L.P.

Marine Transportation Overview

- MMLP utilizes inland and offshore tows to provide marine transportation of petroleum products and by-products.
- MMLP's marine transportation business operates coastwise along the Gulf of Mexico, East Coast and on the U.S. inland waterway system, primarily between domestic ports along the Gulf of Mexico, Intracoastal Waterway, the Mississippi River system and the Tennessee-Tombigbee Waterway system.

Marine Transportation Segment	2017 Adj. EBITDA	2018E Adj. EBITDA
Inland	\$9.2	\$9.4
Offshore	\$2.9	\$3.5
Marine SG&A	\$(4.6)	\$(4.4)
Total Marine	\$7.5	\$8.5

\$ millions

MARTIN MIDSTREAM PARTNERS L.P. — MARINE TRANSPORTATION

Assets

Marine Transportation

- 33 inland marine tank barges
- 18 inland push-boats
- 1 offshore tug and barge unit
- Ability to handle specialty products (asphalt, fuel oil, gasoline, sulfur and other bulk liquids), which complements MMLP's Specialty Terminals
- Marine Transportation contracts with other MMLP segments, MRMC, major and independent oil gas refiners and select international and domestic trading companies.
- Fee-based day-rate contracts

MARTIN MIDSTREAM PARTNERS L.P. – MARINE TRANSPORTATION

Inland & Offshore

Current Environment

- Weak day-rates continue even as utilization has improved
- Contract tenor trending toward short term and spot market
- Asset rationalization continues with \$5.4 million in assets currently held for sale
- Fleet reduction of 13 units (4 boats/9 barges) in last 24 months has significantly reduced operating expenses

Inland Marine Adjusted EBITDA

Offshore Marine Adjusted EBITDA

West Texas LPG Pipeline Rate Update (slide 17)

- Certain shippers filed complaints with the Texas RRC (Railroad Commission of Texas) challenging the increased rates WTLPG (West Texas LPG Pipeline) implemented effective July 1, 2015.
- On March 8, 2016, contrary to the recommendation of the administrative law judge, the RRC issued an order directing that WTLPG charge the rates that were in effect prior to July 1, 2015.
- A hearing on the merits of the complaints was held before a hearings examiner during the week of March 27, 2017.
- The hearings examiner subsequently issued a Proposal for Decision on September 29, 2017. This Proposal for Decision was favorable to WTLPG and found that a competitive market exists both geographically and functionally.
- On December 5, 2017, this matter was delayed until the next RRC meeting on January 23, 2018 as one of the commissioners requested more time to read the case.
- At the January meeting, Commissioner Ryan Sitton strongly agreed with the findings of the hearings examiner that a competitive market exists and acknowledged that the case should be dismissed. Despite such findings, the other two commissioners requested a new (further) market study to be developed for the limited purpose of considering additional relevant evidence regarding competition—nearly 22 months after the RRC's initial ruling.
- On January 31, 2018, WTLPG filed a Motion for Reconsideration asking that the Commission revert back to the previous findings of the hearings examiner, or at a minimum, the Commission consider interim rate relief.
- Our Motion for Reconsideration is on the agenda for February 27, 2018.
