Operational review

Consumer health products can be divided into three market **segments**: OTC (non-prescription, drugs sold over the counter), Rx (prescription drugs) and OTX (vitamins, minerals, supplements and other non-registered OTC products). The Weifa portfolio consists of products in four **categories**: pain relief, cough & cold, nutraceuticals and dermatology. Weifa sells its products through the pharmacy and mass-market **channels**.

Consumer health revenues

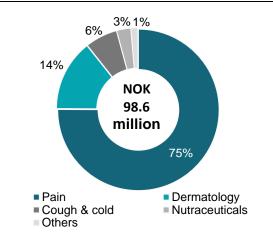

Weifa had total revenues of NOK 98.6 million in the second quarter of 2017, up by 3.4% from NOK 95.3 million for the same period of 2016. The growth was driven by rising demand for the pain relief and cough & cold categories.

Revenues for the first half of 2017 were NOK 198.2 million, up by 3.5% compared with the first six months of 2016 on increased demand for pain relief and cough & cold products.

This growth was all organic. The dermatology category included the acquisition of the Asan portfolio from 1 January 2016.

As shown in the graph below, pain relief remained the dominant category in the second quarter, accounting for 75% of revenues. The dermatology category accounted for 14% and cough & cold for 6%.

Revenues for Weifa's prescription pain drugs (Rx) increased by 6.5% in the second quarter of 2017 compared with the same period of 2016.

Revenues for the pain portfolio as a whole increased by 4.7% from the second guarter of

2016 on rising demand, driven partly by the tail end of an early and lengthy influenza season.

Weifa's revenues in the cough & cold category for the second quarter of 2017 rose by 35% from the same period of last year. The launch of Nazamér mentol nasal spray in the first quarter continued to have a positive effect, as did Solvivo, the new OTC product for sore throats launched in September 2016. Increased sales of Bronkyl and Dexyl more than offset a decline for Tussin and Weifa C.

Metformin sales declined in the second quarter as an effect of the termination of a pharmacy chain agreement in the second quarter of 2016. Sales of Zonat increased from the first quarter of 2017. The effect was nevertheless limited, in line with expectations.

Nutraceuticals revenues decreased by 4.5% from the same period of 2016 owing to lower sales of the Complete product series. The decline more than offset an increase in sales of the Ferromax and Kalsium products.

Revenues from the dermatology category declined by 11% from the same period of last year as lower sales of the Asan product line more than offset an increase in sales of wound treatment products. The decrease for Asan was largely attributable to reduced marketing activity compared with last year. Developments for this category have been stable over the year to date.

9. Purchase price allocation – Cederroth AS

Weifa ASA acquired 100% of the shares in Cederroth AS on 15 January 2016 and consequently controls 100% of the company from that date. The SPA was entered into on 17 December 2015.

The acquisition was made for a total cash consideration of NOK 112.3 million. Cederroth AS is a category leading intimate care brand, known as Asan in Norway and Sana in Sweden.

In the purchase price allocation (PPA), the assets and liabilities of Cederroth AS have been measured at their estimated fair value at 15 January 2016. The fair values of the identifiable assets and liabilities of Cederroth AS at the date of acquisition were:

(NOK 1 000)	Fair value of assets and liabilities

The purchase price allocation identified fair value adjustments to customer relations, inventory, goodwill and deferred tax liabilities. The fair value of intangible assets consists of customer relations (NOK 28 million), goodwill (NOK 33 million) and trademarks (NOK 54.6 million). The adjustments to inventory relate to the excess value of inventory (NOK 0.8 million). The residual value of the purchase price will be allocated to goodwill. None of the goodwill recognised is expected to be deductible for income tax purposes.

Based on the strong position of the trademarks and Weifa ASA's intention to continue the use of the trademarks, the trademarks are considered to have an indefinite useful life. The fair value of customer relationships for the consumer health business is amortised over 20 years. The fair value adjustment to inventory has been recognised as cost of materials in the first quarter when the inventory was sold.

A transaction cost of NOK 3.1 million was expensed in Q1 2016. Additional acquisition costs of NOK 0.8 million were expensed in 2015.
