About Nexstim Plc

Nexstim is a targeted neuromodulation company focused on developing and commercializing its world-leading navigated non-invasive brain stimulation technology, known as SmartFocus™ TMS (transcranial magnetic stimulation), for therapeutic applications, namely stroke, depression and chronic pain via its Navigated Brain Therapy (NBT®) system.
Nexstim has launched its NBT® system in the US for the treatment of Major Depressive Disorder (MDD) following clearance from the FDA for marketing and commercial distribution for this indication. The NBT® system is CE marked in Europe for the treatment of stroke, major depression and chronic neuropathic pain.

The NBT® system is currently in a 60 patient, supplemental Phase III study, E-FIT trial, for its use in stroke rehabilitation. The trial is expected to complete in mid-2018, allowing Nexstim to file for FDA clearance. FDA clearance would allow Nexstim to start marketing and selling its NBT® system for stroke rehabilitation in the US.

In addition, Nexstim is commercialising its Navigated Brain Stimulation (NBS) system for diagnostic applications, based on the same technology. The NBS system is the only FDA cleared and CE marked navigated TMS system for pre-surgical mapping of the speech and motor cortices of the brain.

Nexstim shares are listed on the Nasdaq First North Finland and Nasdaq First North Sweden. For more information please visit www.nexstim.com.
