
BLM Technologies Welcomes Barb Hoeschen to Supply Chain Management Team

Customer-ized solutions are enhanced with the addition of key management talent.

Minneapolis, Minn. – July 11, 2018 – BLM Technologies, a leading single-source provider of complete technology solutions that include payment, transaction and other financial institution hardware, digital signage, repair and maintenance, and information technology services, is pleased to have Barb Hoeschen added to the team as Senior Director of Supply Chain Management.

Barb comes to BLM Technologies with a wealth of knowledge in Operations, Vendor Program Management, Project Management, and Supply Chain Management through her most recent position as Senior Manager of Parts Supply Chain at Best Buy. With more than 15 years of experience in the industry, she has mastered a variety of skills that will be essential in bringing even more success to BLM Technologies' products, services, and solutions. Her focus in this unique role at BLM will be supply chain management, project management, and field service delivery.

"BLM Technologies takes pride in delivering complete solutions on time as well as on budget, and I believe that Barb's background in technology and supply chain management will help our company exceed customer's expectations," said Kevin Flaherty, CEO of BLM Technologies. "Complete solutions include both products and services, both which are incredibly important to our customer's bottom line. Barb's talent for process improvement and efficiency are already evident in her early work with our team."

BLM Technologies takes great pride in what they refer to as "Customer-ized" offerings.

"No two customers are alike," states John Tauer, vice president of sales at BLM Technologies. "Now with Barb's background in both supply chain and operations we are better positioned to respond to each customer's unique needs with product and service combinations that align to bring the best value to our customer."

Barb's skills will bring significant value to BLM's customers by aligning a more efficient and effective supply chain with timeliness and effectiveness of service delivery.

"I could not be more honored to utilize what I have obtained through my years in the technology industry for a renowned business such as BLM," said Barb Hoeschen, newly appointed Senior Director of Supply Chain Management at BLM Technologies. "Leading efforts to fuel the Supply Chain Department as well as create a fresh perspective for all projects is what I'm looking forward to most in my new role."

Barb Hoeschen attended the University of Minnesota Twin Cities with an academic focus in Communications. BLM Technologies is proud to receive her as a key team member and esteemed professional.

About BLM Technologies

BLM Technologies, Inc. solves technology and automation challenges by providing end-to-end solutions in payment and transaction, digital signage, onsite repairs, maintenance repair center service, IT outsourcing, and project management services. By applying 40 years of technical expertise and a consultative, vendor-neutral approach, BLM serves thousands of customers in the U.S. by packaging hardware and services to provide complete, turnkey technology solutions for customers across multiple industries including financial, retail, restaurant, education, healthcare, and government.

A proven single-source provider of technology products and services, BLM Technologies partners with the top manufacturers in the technology industry to offer customers the newest and most innovative technology solutions available. Headquartered in Minneapolis, Minnesota, BLM Technologies has additional facilities strategically located in Virginia, Missouri, and California to serve IT and repair customers quickly and conveniently.
