## Infant Bacterial Therapeutics publishes Annual Report for 2017

Today, Infant Bacterial Therapeutics AB (publ) publishes the Annual Report for the financial year 2017. The report is available on IBT's website under the section Financial Reports <http://ibtherapeutics.com/investors/financial-reports/>.

Shareholders and other stakeholders wishing to receive the Annual Report via post can request this by sending an email to [ibt@ibtherapeutics.com](mailto:ibt@ibtherapeutics.com).

### **About Infant Bacterial Therapeutics AB**

Infant Bacterial Therapeutics AB (publ) ("IBT") is a clinical stage pharmaceutical company with a vision to develop drugs influencing the infant microbiome, and thereby prevent or treat rare diseases affecting infants.

IBT is currently developing its lead drug candidate IBP-9414 to prevent NEC in premature infants. IBP-9414 contains the active substance *Lactobacillus reuteri*, which is a human bacterial strain naturally present in breast milk. IBT is further pursuing a second rare disease program IBP-1016 for the treatment of an unmet medical need in gastroschisis, a severe congenital disorder in infants. By developing these drugs, IBT has the potential to fulfil unmet needs for diseases where there are currently no prevention or treatment therapies available.

IBT is listed on Nasdaq First North Premier with Erik Penser Bank as Certified Adviser.
