Green Building Initiative Announces 2019 Board of Directors

Stimson Lumber, Ewing Irrigation & Landscape, JLL, JL Architects, and Mitsubishi Electric take on new GBI Board roles

Portland, Ore. – The Green Building Initiative (GBI) is pleased to announce the election of its 2019 Board of Directors. Outgoing GBI Chair Rich Mitchell—managing principal architect of Mackenzie, a Portland, Ore., based architecture firm—has passed the gavel after a two-year term to Tim Atkinson, vice president of sales for Stimson Lumber Company of Portland, Ore., who also serves as president of the Pacific Northwest Association of Rail Shippers.

Atkinson takes the reins following the largest two-year growth period in GBI's history, during which the organization supported more than 465 building projects that earned third-party assessment and certification through its Green Globes® and federal Guiding Principle Compliance® (GPC) programs. Atkinson has served on the GBI Board of Directors since 2013 and served as Treasurer from 2017 to 2018.

GBI 2017 to 2018 Accomplishments

In the last two years, GBI completed major steps toward its goals of increasing its impact in the market and promoting new levels of transparency. Accomplishments include:

- Acquiring the global rights for Green Globes and advancing the revision of Green Globes for New Construction, its flagship rating system, through a multi-year American National Standards Institute [consensus process](#).
- Supporting building owners and their practitioners and consultants through the assessment and certification process of 462 Green Globes building certifications. GBI has [certified](#) a total of 1699 buildings using Green Globes and GPC since 2004.
- Increasing understanding of sustainability issues in a building's life cycle through education and professional credentialing programs that include instruction on New Construction, Core and Shell, Existing Buildings, and Sustainable Interiors (tenant improvements). More than [800 certified](#) Green Globes Professionals (GGPs) and Guiding Principle Compliance Professionals (GPCPs) are supporting building projects throughout the world.

- Launching a revised [membership program](#) that provides access to GBI's member benefits to organizations for as little as \$500. Additionally, new [bylaws](#) were approved that encourage involvement of the organization's growing membership in all levels of governance.

"GBI has carved out a unique niche in the market," stated Atkinson. "Over the last two years, we've seen GBI increase education and promotion of Green Globes and develop customized tools to support private and public sector owners, practitioners, and contractors with understanding that sustainability can be incorporated into every building type – no matter the size, budget, or unique function. With GBI's Green Globes and GPC programs, the market is remembering that third-party certification can apply to all buildings and be both comprehensive *and* flexible."

GBI 2019 Initiatives

The new GBI Board will oversee execution of an aggressive education and promotion plan for 2019. It will include:

- Launching a brand-new user-friendly Green Globes software platform to include portfolio management support;
- Releasing a bimonthly thought leadership webinar series to include case studies from portfolio owners, lessons learned from Three and Four Green Globes certified projects, and education and support for pilots of the new versions of Green Globes New Construction and Existing Buildings certification programs, that will pilot in 2019;
- Growing membership involvement in GBI's performance and tool development, government engagement, and education and promotion committees; and
- Increasing awareness of GBI's unique GPCP credentialing program to support federal government practitioners and their contractors on Guiding Principles and UFC compliance requirements. GBI has overseen third-party Guiding Principles Compliance assessment of 269 federal buildings and certified an additional 338 federal buildings through Green Globes.

"I look forward to helping GBI continue to increase its positive impact by expanding knowledge of GBI's collaborative, high-value approach to third-party certification," stated Atkinson.

GBI President & CEO Vicki Worden added, "We welcome three new Board members to help GBI accomplish its goals in 2019. Our Board members bring tremendous knowledge and dedication to advancing sustainability in the built environment, and we are grateful for their willingness to serve."

Worden noted appreciation for the dedication and leadership of Rich Mitchell, outgoing Chair, and the contributions of Mary Ann Dickinson of the Alliance of Water Efficiency, whose Board term ended in 2018.

2019 Board Members and Officers

New GBI Board Members

- John Lister, Principal, JL Architects, West Chester, PA – term 2021
- Jenna Rowe, Sr. Vice President, Sustainability, JLL, Indianapolis, IN – term 2021
