### **Hexagon's Positioning Intelligence Attains Major Milestone in the Drive to Safe Autonomy**

(Calgary, Canada, May 22, 2018) Hexagon's Positioning Intelligence division is pleased to announce the latest milestone achieved on the road to safe autonomy. The company's ground-breaking initiative is on a mission to develop functionally safe positioning technologies for fully autonomous vehicles and other applications.

As part of the company's firm commitment to this mission, a third-party audit has been completed that confirms process compliance with key automotive specifications ISO/TS 16949 and ISO 26262 Functional Safety Design Assurance. This is an important step toward the development of functionally safe new technology that meets the exceptional safety standards set by the automotive industry.

"We're thrilled to have our core engineering processes updated to meet the requirements of automotive applications. We are building on a 25+ year history in safety of life solutions for the marine and aviation industries, and we expect this leadership to serve us well in automotive." said Jonathan Auld, Vice President of Safety Critical Systems, Hexagon's Positioning Intelligence division.
